

# Movie Tracking App

**By The Jojos**

# What is the problem?

- We watch a lot of movies. We can't remember all of it.

**We already do have a website for it but the process/step by step is sometimes annoying**

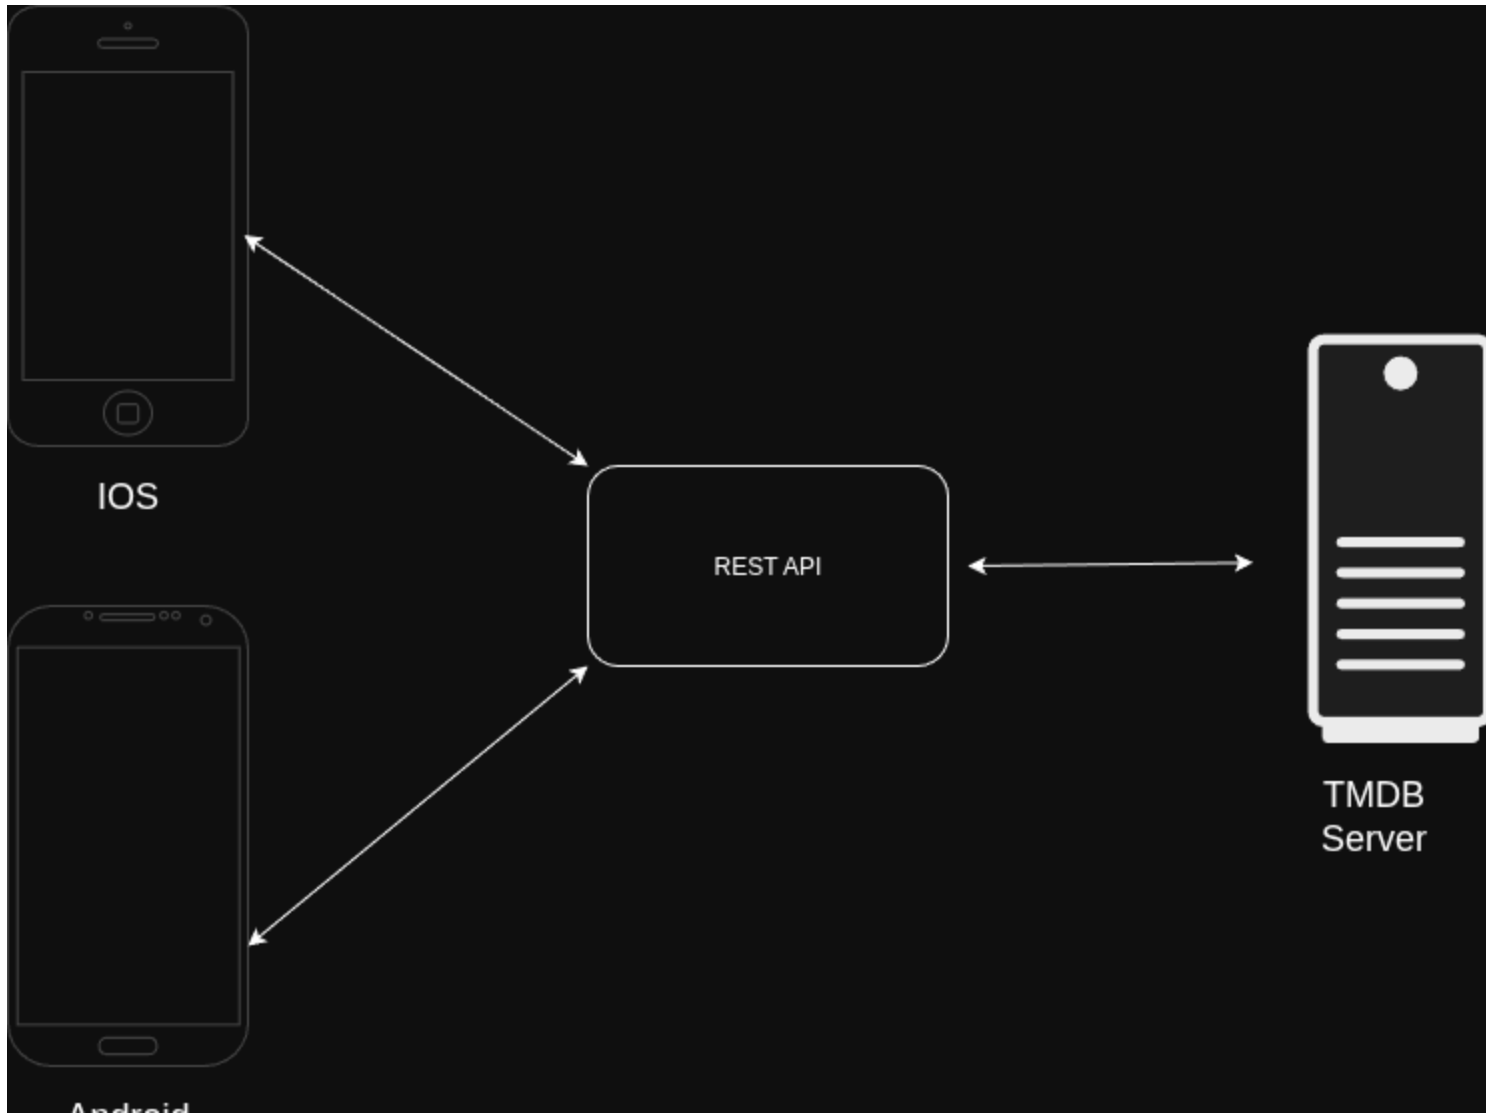

# Accessing TMDB via website

**Open Google Chrome -> Search Tmdb website -> Select the website -> login -> Use app**

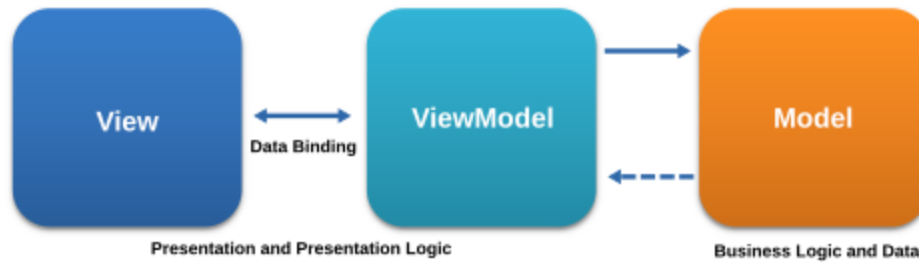

# **Accessing movies via a mobile app**

**Open Application -> Login -> Use app**

# App Architecture

# App Design Pattern (MVVM)

- Collaboration/Separation of concerns
- Scalability
- Testing.

# Features

## Sprint 1:

Feature 1 - Login Authentication

Feature 2 - UI/UX Design

Feature 3 - Rating/Scoring (Detail page)

Feature 4 - Comments

## Sprint 2:

Feature 5 - Lists (HomeScreen)

Feature 6 - Recommendation Pages

Feature 7 - Profile Page

Feature 8 - Sorting Filtering

**Remaining week will be improving UI and maybe adding a bit more features**
